

Magic Swing Car Wash

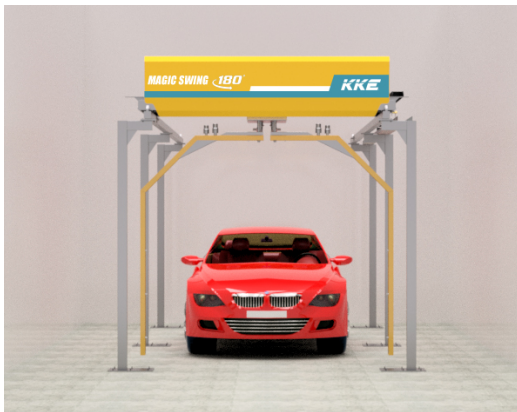

KKE Magic Swing :
Benefits at a glance.

- 1 Compact
- 2 Advanced Micro Controller Based
- 3 High Pressure Precision
- 4 Galvanised Steel Structure

MAGIC SWING 180°

MAGIC SWING 360°

Rotating Arms 180° 360°

The arms rotate 180° & 360° depending upon the Magic Swing model. The arms help get the car washed properly.

High Pressure 180° 360°

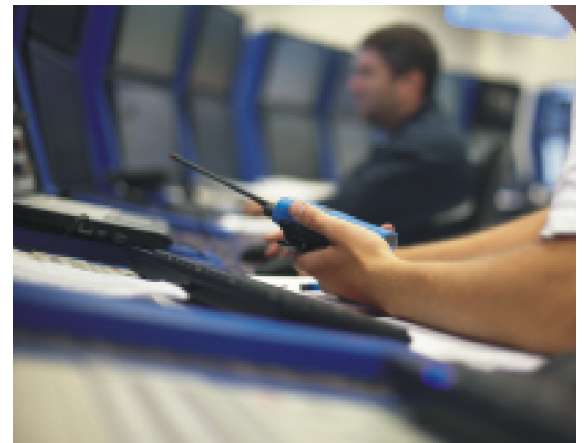

The high performance nozzles are made of Stainless steel made with CNC precision. The nozzles fluid spray Pattern and force is directly related to the precision of the nozzles.

Triple Foam Wax 360°

Attract your customers with triple foam wax. The three colour foam wax delight your customers and makes them come back again & again.

Lava Foam 360°

There is nothing more exciting than getting a rich foam bath on your car. The customers just love it!

Control Room System 180° 360°

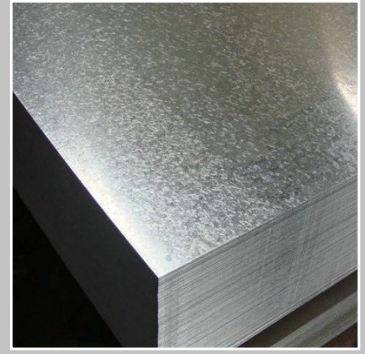

The entire Pumping Station, Chemical Systems, Control System can be monitored from the Control Room. The Operator doesn't need to go to the wash bay to make changes. Everything can be handled from the Control Room itself

Control System 180° 360°

The equipment is controlled using an advanced Microcontroller system. The system operates at a high speed of 300MHz and quickly responds to each and every signal from various sensors present on the equipment.

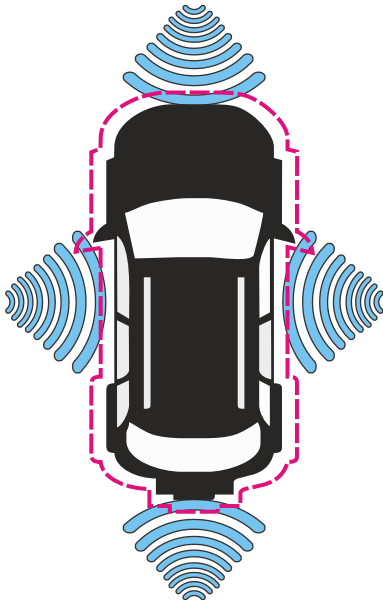

Rugged Galvanised Steel Structure ^{180°} ^{360°}

The equipment is made from Hot Dip Galvanised Steel which gives high corrosion resistance from harsh alkaline car wash chemicals which Aluminium Structures cannot provide.

Internet Connectivity ^{360°}

The equipment is connected to the Internet and can be accessed from remote location. You can also access the equipment settings from our Customer Machine Portal.

Automatic Vehicle Sensing ^{360°}

The equipment senses the location of the car and adjusts the arm location accordingly. The ultrasound sensors give precise location of the car in the wash bay. (Infographic required)
